

RAG News Digest — 2026-06-14

Auto-generated digest covering the latest research and industry news in Retrieval-Augmented Generation, vector search, embeddings, and knowledge graphs.

Latest Research Papers (arXiv)

RAG-Specific Papers

#	arXiv ID	Title
1	2606.13680	Learning to Reason by Analogy via Retrieval-Augmented Reinforcement Fine-Tuning
2	2606.13647	SkMTEB: Slovak Massive Text Embedding Benchmark and Model Adaptation
3	2606.13610	One Polluted Page Is Enough: Evaluating Web Content Pollution in Generative Recommenders
4	2606.13550	Uncertainty-Aware Hybrid Retrieval for Long-Document RAG
5	2606.13438	CQC-RAG: Robust Retrieval-Augmented Generation via Cross-Query Consistency
6	2606.13397	Mod-Guide: An LLM-based Content Moderation Feedback System to Address Insensitive Speech toward Indigenous Ethnic and Religious Minority Communities
7	2606.13275	Zero-Shot Captioning for Cultural Heritage: Automated Image Analysis of Traditional Indonesian Clothing
8	2606.13267	TimeLens: On-Device Artifact Recognition with Retrieval-Augmented Question Answering for the Grand Egyptian Museum

9	2606.13262	From Verdict to Process: Agentic Reinforcement Learning for Multi-Stage Fact Verification
10	2606.13249	Multi-Field Hybrid Retrieval-Augmented Generation for Maritime Accident Root Cause Analysis

Vector Database & Embedding Papers

#	arXiv ID	Title
1	2606.11853	Task-Aware Structured Memory for Dynamic Multi-modal In-Context Learning
2	2606.11780	What Limits Does Quantization Place on Dense Top- k Retrieval? A Theoretical Study
3	2606.11391	Recursive Binding on a Budget: Subspace Carving in Order-p Tensor Memories
4	2606.11350	When More Documents Hurt RAG: Mitigating Vector Search Dilution with Domain-Scoped, Model-Agnostic Retrieval
5	2606.11117	Towards Autonomous Accelerator Design: FPGA Accelerator Generation with SECDA
6	2606.10475	Decoupling Thought from Speech: Knowledge-Grounded Counterfactual Reasoning for Resilient Multi-Agent Argumentation
7	2606.10471	Detecting Speculative Language in Biomedical Texts using Recurrent Neural Tensor Networks
8	2606.09888	SinkRec: Mitigating Semantic State Sink in Long Sequence Recommendation with Memory-Conditioned Gated Delta Networks
9	2606.09758	Difference-Aware Retrieval Policies for Imitation Learning
10	2606.09331	Conan-embedding-v3: Fusing Modality-Specific Models for Omni-Modal Embedding

Graph RAG & Knowledge Graph Papers

#	arXiv ID	Title
1	2606.13669	Agents-K1: Towards Agent-native Knowledge Orchestration
2	2606.13306	EconCSLib: AI-Assisted Lean Formalization for Economics & Computation research
3	2606.13115	G-Long: Graph-Enhanced Memory Management for Efficient Long-Term Dialogue Agents
4	2606.13024	CausalMoE: A Billion-Scale Multimodal Foundation Model for Granger Causal Discovery with Pattern-Routed Heterogeneous Experts
5	2606.13020	SciR: A Controllable Benchmark for Scientific Reasoning in LLMs
6	2606.13007	scLLM-DSC: LLM-Knowledge Enhanced Cross-Modal Deep Structural Clustering for Single-Cell RNA Sequencing
7	2606.12852	WISE: A Long-Horizon Agent in Minecraft with Why-Which Reasoning
8	2606.12780	ProPlay: Procedural World Models for Self-Evolving LLM Agents
9	2606.12474	SAIGuard: Communication-State Simulation for Proactive Defense of LLM Multi-Agent Systems
10	2606.12385	Which Models Are Our Models Built On? Auditing Invisible Dependencies in Modern LLMs

Industry News

Hacker News — AI/Related Stories

- **Amazon CEO's talks with U.S. officials triggered crackdown on Anthropic models** [606 pts]

Hacker News — Top Stories (General)

1. The Redistribution of Housing Wealth Caused by Rent Control [pdf] [49 pts]

2. 10th Gen Honda Civic Updates Are Signed with AOSP Test Keys [109 pts]
3. Noise infusion banned from statistical products published by Census Bureau [773 pts]
4. GLM 5.2 Is Out [427 pts]
5. Every Frame Perfect [622 pts]
6. Building a serial and VGA "everything console" [9 pts]
7. FreeOberon – Open-Source, Cross-Platform, Free Pascal/Turbo Pascal-Like Language [49 pts]
8. Treating pancreatic tumours may have revealed cancer's master switch [324 pts]
9. Pyodide 314.0: Python packages can now publish WebAssembly wheels to PyPI [98 pts]
10. Python 3.14 garbage collection rigamarole [19 pts]

Ars Technica — Technology & AI

- Millions of AI agents imperiled by critical vulnerability in open source package
 - Fed up with vibe coders, dev sneaks data-nuking prompt injection into their code
 - US government takes \$2 billion equity stake in nine quantum computing firms
 - A hacker group is poisoning open source code at an unprecedented scale
 - Google publishes exploit code threatening millions of Chromium users
 - US's big bet on quantum computing may not be entirely legal
 - Botnet of more than 17 million devices dismantled
 - Dozens of Red Hat packages backdoored through its official NPM channel

Trending Topics in RAG

1. **Robustness & Reliability** — Multiple papers address RAG failure modes: CQC-RAG (cross-query consistency), uncertainty-aware retrieval, and mitigating vector search dilution. The field is moving beyond "does it work" to "when does it fail."
2. **Long-Context & Hybrid Retrieval** — Uncertainty-Aware Hybrid Retrieval for Long-Document RAG and Multi-Field Hybrid RAG for maritime analysis show the push toward handling complex, multi-modal document collections.
3. **Embedding Model Evolution** — New benchmarks (SkMTEB for Slovak), quantization theory for dense retrieval, and omni-modal embeddings (Conan-embedding-v3) signal continued investment in retrieval infrastructure.

4. **Agent-Native Knowledge** — Agents-K1 and G-Long represent a shift toward graph-enhanced, agent-native knowledge orchestration — RAG is becoming a core component of autonomous agent architectures.
 5. **Security Implications** — Both in research (web content pollution in generative recommenders) and industry news (AI agent vulnerabilities, prompt injection), security around retrieval and agent systems is a growing concern.
 6. **Domain-Specific RAG** — Papers targeting maritime accident analysis, cultural heritage, museum artifact recognition, and biomedical text show RAG's expansion into specialized verticals.
-

Key Takeaways

- **RAG is maturing:** Research is shifting from basic retrieval-augmented generation to robustness, uncertainty quantification, and domain-specific optimization. Cross-query consistency (CQC-RAG) and hybrid retrieval are the new frontiers.
 - **Vector search has limits:** New theoretical work on quantization effects on dense retrieval and the "too many documents" dilution problem suggest that naive vector search scaling is hitting walls — smarter, domain-scoped retrieval is needed.
 - **Embeddings are going multimodal:** Conan-embedding-v3 fuses modality-specific models for omni-modal embedding, and SkMTEB extends benchmarking to underrepresented languages. The embedding ecosystem is diversifying rapidly.
 - **Graph + RAG convergence:** Graph-enhanced memory management (G-Long) and agent-native knowledge orchestration (Agents-K1) show that knowledge graphs and RAG are merging into unified architectures.
 - **Security is a growing concern:** From web content pollution attacks on generative recommenders to critical vulnerabilities in AI agent open-source packages, the attack surface of RAG and agent systems is expanding — SAIGuard and similar defensive frameworks are emerging in response.
 - **Industry momentum:** GLM 5.2 release, Amazon-Anthropic regulatory tensions, and US government quantum computing investments all signal continued heavy investment in AI infrastructure that will drive RAG adoption.
